

Massachusetts Development Finance Agency Short Term Asset Reserve Fund

The STAR Fund was established in 1991 and provides competitive, comprehensive investment management for the proceeds of bonds issued by the Massachusetts Development Finance Agency.

The STAR Fund is a professionally managed short term investment fund created to provide investors with a convenient method of pooling bond proceeds pending their expenditure. This pooled fund offers investors the following:

- **Daily liquidity, including transactions by wire and/or ACH**
- **Unlimited investments and redemptions**
- **Unlimited sub-accounting to track multiple revenue sources or projects**
- **Online account access**

Investment Objective

The STAR Fund seeks to preserve principal, maintain liquidity and attain a level of current income as high as is consistent with those objectives.

Investment Philosophy

The STAR Fund invokes a dynamic yet disciplined investment philosophy in which the Fund's investment advisor actively responds to changes in market conditions. The Fund's return, therefore, may be enhanced through prudent trading and portfolio restructuring without subjecting the portfolio to unnecessary risk.

The Fund's investment advisor seeks to optimize investment returns through careful analysis of and investment in short-term government securities and other high-quality money market instruments while preserving the safety and liquidity of the underlying principal.

¹ Current 7-day net yield, also known as the current annualized yield, represents the net change, exclusive of capital changes and income other than investment income, in the value of a hypothetical account with a balance of one share (normally \$1.00 per share) over a seven-day base period expressed as a percentage of the value of one share at the beginning of the seven-day period. This resulting net change in account value is then annualized by multiplying it by 365 and dividing the result by 7.

² Weighted Average Maturity: Calculated by the final maturity for a security held in the portfolio and the interest rate reset date. This is a way to measure a fund's sensitivity to potential interest rate changes.

³ As of the last day of the month. The 30-day yield represents the net change, exclusive of capital changes and income other than investment income, in the value of a hypothetical account with a balance of one share (normally \$1.00 per share) over a thirty-day base period expressed as a percentage of the value of one share at the beginning of the thirty-day period. This resulting net change in account value is then annualized by multiplying it by 365 and dividing the result by 30.

Past performance is no guarantee of future results. Yields will fluctuate as market conditions change. The current Fund performance may be higher or lower than that cited. The yields shown may reflect fee waivers by service providers that subsidize and reduce the total operating expenses of the Fund. Fund yields would be lower if there were no such waivers. Standard & Poor's fund ratings are based on analysis of credit quality, market price exposure, and management. According to Standard & Poor's rating criteria, the AAAM rating signifies excellent safety of investment principal and a superior capacity to maintain a \$1.00 per share net asset value. However, it should be understood that the rating is not a "market" rating nor a recommendation to buy, hold or sell the securities. For a full description on rating methodology, visit Standard & Poor's website (http://www.standardandpoors.com/en_US/web/guest/home).
