## Featured Company

### Beeken Biomedical

On April 8, 2021, MassDevelopment closed on a \$1,500,000 ETF loan to Beeken Biomedical, LLC. Beeken was founded in July 2010 as a life sciences company dedicated to commercializing products that advance the field of bleeding control. Beeken's product suite is sold under the NuStat brand, which incorporates the company's patent-protected Hemafiber Technology. Beeken's Hemafiber Technology focuses on all aspects of hemostasis including platelet aggregation and activation, clotting amplification, compression, and vasoconstriction. The mechanisms of action begin when blood is exposed to the Hemafiber dressing. At contact, plasma proteins absorb to the surface in very high local concentrations providing attachment sites for platelets. The cellulose component within the Hemafiber provides enhanced wicking and absorption, while pulling excess blood into the bandage creating further contact with the silica fiber component of the dressing. The Hemafiber enabled NuStat line of products enables first responders, soldiers, and healthcare providers the ability to rapidly control bleeding by applying NuStat products to establish hemostasis. Beeken's products are utilized in situations from the front lines to the operating table.

## Program History

The mission of the Emerging Technology Fund (ETF) is to create jobs in Massachusetts by providing financing for facilities, equipment, and working capital that leverages private financing to growing companies employing or commercializing emerging technologies.

Since its creation in 2003, the ETF has helped cutting-edge companies locate or expand in the Commonwealth, providing jobs and strengthening the innovation economy. The ETF has leveraged private investment for companies and maintained its ability to serve as an “evergreen fund,” providing unconventional risk capital in the form of debt to development-stage emerging technology companies seeking to commercialize their products. In an effort to increase both employment and production, the Commonwealth passed legislation in 2010 that allowed MassDevelopment to offer a working capital term loan product from the Fund to help growing companies address staffing and other working capital needs. This new capability has been well-received especially in light of new technological developments in Deep Tech, Digital Health, and Artificial Intelligence (AI).

The ETF was recapitalized in 2007, and in 2010, the Legislature transferred \$15 million to launch the Massachusetts Growth Capital Corporation. Since then, the Fund has taken various measures to ration capital. These measures, as well as early loan payoffs from successful portfolio companies, have stabilized the Fund’s liquidity position. The Fund has restored its maximum loan size to \$2.5 million and can now support larger expansions. The ETF, however, continues to rely on loan repayments to capitalize new loans and may need recapitalization if new investments for business expansions and relocations outpace loan repayments.

## Background

Chapter 141 of the Acts of 2003 created the ETF. The statute requires submission of this quarterly report to certain legislative committees. Established to leverage private investment and to recruit and retain technology-based and advanced manufacturing companies in the Commonwealth, the approximately \$53 million Fund provides loans and guarantees for the purchase, expansion, or improvement of real estate; purchase of equipment; and working capital needs. The Fund was initially capitalized with \$24.75 million, recapitalized in September 2006 with \$10 million as a result of an economic stimulus bill passed by the Legislature, and then recapitalized again in November 2007 with an additional \$15 million. In November 2010, \$15 million was transferred from the Fund to capitalize the Massachusetts Growth Capital Corporation in accordance with signed legislation. The Fund is governed by an Advisory Committee that has adopted the following mission statement:

***The mission of the Emerging Technology Fund is to create jobs in Massachusetts by providing financing for facilities, equipment and working capital that leverages private financing to growing companies employing or commercializing emerging technologies.***
