

PACE Application - Supporting Technical Documentation

An electronic copy of only the supporting technical documentation (including all attachments) should be sent concurrently to the DOER Office (doer.cpace@mass.gov)

The electronic submittal should be sent to DOER using a file share service. The entire electronic submittal, including all attachments, drawings, and plans, must be accessible and legible. Additionally, please ensure the submittal meets the following criteria:

- The link to download the electronic submittal must be accessible by others (not just the direct recipient).
- All electronic submittals over 50 pages must include bookmarks or an electronic table of contents that provides direct links to each of the sections and appendices. Alternatively, each section and appendix should be provided as a separate file.
- Permissions must be set to allow for the electronic document to be downloaded from a file-sharing website without requiring an individual to create an account. This provision does not apply to secure FTP file sharing websites.

Due to volume restrictions of the mass.gov email system, please do not directly send the electronic submittal as a PDF. Please be prepared to provide copies of electronic submittals in an alternative format (such as reduced file sizes or zip files) to anyone requesting to receive them.
